key market served

Surgical Drapes

A variety of single and double coated tape products that were designed to withstand the rigors of surgery with minimal affect due to surgical fluid exposure, radical changes in temperature or mechanical stress, as well as Eto and gamma sterilization.

Double Coated Tapes

DC Series

DC 1731D - Aggressive medical grade acrylic on each side of .5mil PET carrier.

DC 3340F - General purpose medical grade acrylic on each side of 3mil PE film carrier.

DC 1393A - General purpose medical grade acrylic on each side of .5mil PET carrier.

Single Coated Tapes

Flexible Film FF Series

FF 2203R - 3mil PE film with an aggressive general purpose medical grade acrylic.

new product profile

DC 900SE

Covalence Adhesives, a leading provider of high quality pressure sensitive tape products, announces the launch of a new double coated tape for the medical device industry.

Capitalizing on our strength in formulating adhesive systems and our experience in skin-contact pressure sensitive adhesives, Covalence Adhesives is expanding our diverse line of medical products to include DC 900SE, a double coated tape with a proprietary synthetic elastomer adhesive, on each side of a .5mil PET Carrier.

IDEAL FOR A VARIETY OF APPLICATIONS

DC 900SE is coated with an aggressive medical grade synthetic elastomer designed to adhere to difficult to bond substrates. Typical uses include surgical drape, foam bonding, medical device assembly and mounting medical devices to skin.

product categories

Our tape products have been used extensively in bandages, wound care, first aid kits, electrodes, pulse oximetry, diagnostics, surgical drapes, transdermal patches and device assemblies manufactured throughout the world.

WV Wovens - Many varieties of poly, cotton, nylon blends, taffeta, tricot, and coated and uncoated cotton.
